

# AFL Overview

# Fujikura Parent Company

- Annual sales exceeding U.S. \$7 Billion
- 35% of Fujikura's sales from telecommunications and optics
- Pioneer in fiber technology
- Leading manufacturer of optical fiber and cables
- Leader in optical connectivity technology
- Global manufacturing footprint
- AFL: 100% wholly owned by Fujikura

# AFL FTTx/ PON/ MDU

## Complete Integrated Solutions

# APEX

FIBER OPTIC SPLICE CLOSURES

# Highlights

- Increased density – especially with SWR
- Individual sealing ports
- Apex dome O ring retained but field replaceable
- Ease of Installation - Can Wrench
- Reduced components
  - ONLY 1 “Universal” tray per closure    Single , mass, PLC,OADM (hybrid in 1 tray)
- Next Generation Splice Tray - modules, cover, storage
- No longer issues with whose single sleeve will fit in a splice tray manifold
- Grounds are factory installed only
- Large basket with multiple tie down locations
- Optional Inner Basket on X-2 only
- Tested to GR 771 & PASSES 20’ waterhead
- Significant number of field replaceable parts

# Sizes

Apex Model*	Dimensions (Length x Diameter)	Weight	Number of Splice Trays	Splice Capacity		
				Single Fusion	Mass Fusion	
					Standard Ribbon	SpiderWeb Ribbon® (or rollable fiber)
X-2	25 in. x 12 in.	25 lbs.	6	432	864	3,456 (200 µm) 1,728 (250 µm)
X-2S	20 in. x 12 in.	22 lbs.	6	216	432	1,728 (200 µm) 864 (250 µm)

\* Small and Large sizes coming in 2021

- Same Base for X-2 and X-2S
- Common hardware and accessories between them
- Single Universal Closure for most applications

**APEX** X-2

**APEX** X-2S

# SWR & OSP MicroCore

## What is the SWR & WTC?

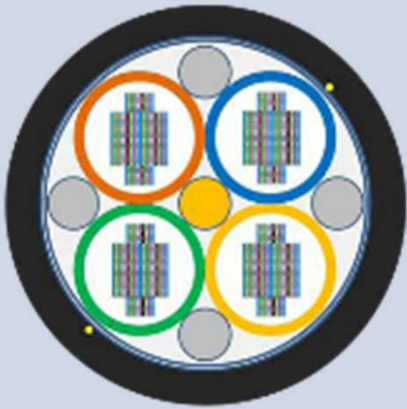

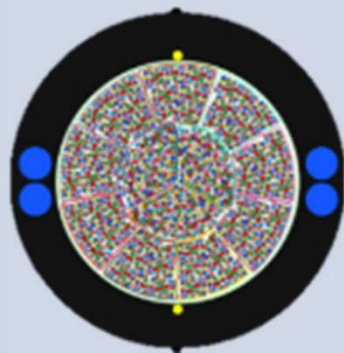

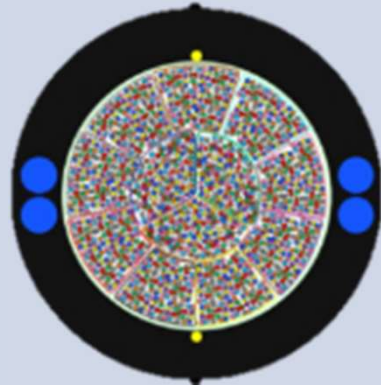

**Spider Web Ribbon (SWR)**

**Wrapping Tube Cable (WTC)**

	Company A	Company B	AFL	AFL
Fiber count	1728 fiber	1728 fiber	1728 fiber	3456 fiber (New)
Cable	Ribbon loose tube	Ribbon loose tube	WTC/SWR	WTC/SWR
Ribbon	12f ribbon & 24f ribbon	12f ribbon & 24f ribbon	12f SWR	12f SWR
Structure				
Diameter	1.34" (34.0mm)	1.25" (31.5mm)	0.870" (20.5mm)	<b>0.1.18" (30.0mm)</b>

# OSP and I/O MicroCore Product Family

Series Name	MicroCore Selection	Fiber Range	Conductors	Fiber Types	Applications	Target Pathway Environments
<b>LM-Series</b>	OSP MicroCore All-dielectric	12-432	N/A	SM, OM2, OM2, OM4	FTTX, Campus, Local-loop and Long-haul	Underground Micro-ducts
<b>LM-Series EZ-TONE</b>	OSP MicroCore with locate/tone wire	12-432	1x 20AWG (Solid)	SM, OM2, OM2, OM4	FTTX, Campus, Local-loop and Long-haul	Underground Micro-ducts
<b>LM-Series HD</b>	LM-Series Heavy Duty for Aerial Lashing	12	N/A	SM, OM2, OM2, OM4	Micro-duct to lashed aerial	Underground Micro-ducts and aerial lashed
<b>LM200-Series</b>	LM-Series using 200µm optical fiber	24-432	N/A	SM Only	FTTX, Campus, Local-loop and Long-haul	Underground Micro-ducts
<b>LMZ-Series</b>	NFPA 130 and NEC OFNG/LS	12-144	N/A	SM, OM2, OM2, OM4	ONFG-LS, Indoor/Outdoor	Rail, Airport, Industrial
<b>LM-Series Composite</b>	OSP MicroCore with Power Conductors	12-144	2, 3 and 4 - 16 AWG TFFN	SM Only	FTTX with remote power requirements	CCTV, DAS, WAP

# Product Overview – LM-Series OSP MicroCore®

12-f to 144-f designed for 10 mm ID Micro-ducts

LM 144 in 7-way Micro-duct.  
Total of 1,008 fibers

Conventional 144-f LT

288-f designed for 10 mm ID Micro-ducts

LM 288 in 7-Way Micro-duct.  
Total of 2,016 fibers

Conventional 432-F OSP Loose  
Tube in 2" Inner-duct

432-f designed for 16 mm ID Micro-ducts

LM 432 in 7-Way Micro-duct.  
Total of 3,024 fibers

Conventional 432-F OSP Loose  
Tube in 2" Inner-duct

# LM-Series Heavy Duty

- Features

- Thick-walled LM-Series
- GR-20 compliant
- Can be jetted AND aerially lashed
- Thicker jacket wall allows cable to be lashed using convention cable lashing equipment and methods
- Micro-duct size typically increase by 2mm compared to LM-Series of the same fiber-count

# Switchblade FCV

# Overview - Switchblade

- Features & Benefits

- Folding design
  - Reduces:
    - Shipping costs
    - Storage footprint
  - Increases:
    - Productivity
    - Speed to market
- Lowest weight in the category (Size & Classification)
  - Base - 66 lbs.
  - Lid - 48 lbs.
  - Extension - 26 lbs.
- Flared wall design
  - Optimizes internal volume
  - Compresses coiled cable
  - Minimizes frost heave
- Non-conductive/Non-corrosive Glass Filled Polyethylene
- Tier 15 rated
  - 22,500 lb tested

# FUSEConnect® Fusion Spliced Field-Terminated Connectors

- Uniquely designed and feature just four components
- Factory pre-polished ferrule and innovative field-termination process eliminates polishing, adhesives and crimping in the field minimizing the potential for operator error and expensive connector scrap
- Use a fusion splicer to terminate the connector in the field, addressing return loss concerns present in analog optical networks
- Advanced process yields true APC performance of >65 dB return loss in an SC/APC configuration
- SC single-mode connector compliant to GR-326-CORE
- Designed to work with industry standard splicers utilizing fiber holders
  - Compatible with Fujikura fusion splicers and most other fiber holder-based fusion splicing platforms

# FASTConnect® Field-Installable Connectors

- Factory pre-polished, field-installable connectors that completely eliminate the need for hand polishing in the field
- Proven mechanical splice technology ensures precision fiber alignment
- Factory pre-cleaved fiber stub and a proprietary index-matching gel combine to offer an immediate low loss termination to either single-mode or multimode optical fibers
- Compatible with 250  $\mu\text{m}$  and 900  $\mu\text{m}$  optical fibers as well as 900  $\mu\text{m}$ , 2 mm and 3 mm cordage
- Supports all primary fiber types
- Color-coded connectors (per industry standard requirements) aide in identification during and after installation
- Remove and discard factory-installed wedge clip (included with each connector) upon completion of the termination
- Innovative, translucent wedge (incorporated into this device) enables use of a common Visual Fault Identifier (VFI) to provide a “pass/fail” signal on physical contact

# Optical Connectivity: TITAN

## AFL TITAN RTD™ Multiport Terminal

- TRIDENT™ Hardened Connector ports for speedy customer connections
- Available with flat drop cable stubs – toneable and dielectric (pushable microdrop coming soon)
- Factory sealed for deployment in up to 10 feet of water head, but **re-enterable** for connector repair
- Fully Telcordia GR-771 Compliant
- Installation Accessories
  - Strand Mount Bracket
  - Pole Mount = features integrated into Terminal Base
  - Pedestal Mount = mounting holes integrated into Terminal Base

# Optical Connectivity: TRIDENT

## AFL TRIDENT™ Hardened Fiber Connectors

- GR-3120 Compliant Design
- Dielectric design (eliminates grounding/bonding and corrosion concerns)
- Improved ergonomics with positive mechanical indication connector is engaged in adapter
- Quarter-turn BNC-style locking/sealing design
- Similar form-factor as Corning Optitap
- Utilize GR-326 Tested SCAPC design know-how

# OPN Duo

- Up to 4 SC simplex or LC duplex adapters
- Integrated, molded-in splice tray holds up to 18 single or 6 mass fusion splices using AFL's new splice module. Can also hold PLCs or mechanical splices
- Optional splice/security cover protects fibers in splice tray and/or provider-side connectors
- Two cable entry options in base – U-shaped grommets or half-inch holes for grommets, conduit fittings, or compression glands
- Can be kitted based off customer needs – see spec sheet for configuration options

# OPN-500

- Designed for use in either indoor or outdoor environments
- Suited for FTTH demarcation applications
- Versatile enough to suit Cat5 or coax connections
- Capable of housing up to six bulk-head adapters in one LGX® 118 compatible adapter plate
- Equipped with an integrated splice tray, which holds up to six single fusion splices

# Test and Inspection Products

- Optical Time Domain Reflectometers
- Optical Certification Test Sets
- Power Meter and Light Source Kits
- Optical Fiber Identifiers and Visual Light Sources
- Connector Inspection Scopes and Probes
- Optical Test Accessories
- Optical Attenuators
- Optical Talk Sets
- Fiber and Connector Cleaning Systems
- TRM Records and Reporting Software
- Repair and Calibration Services

# FLEXSCAN® Overview

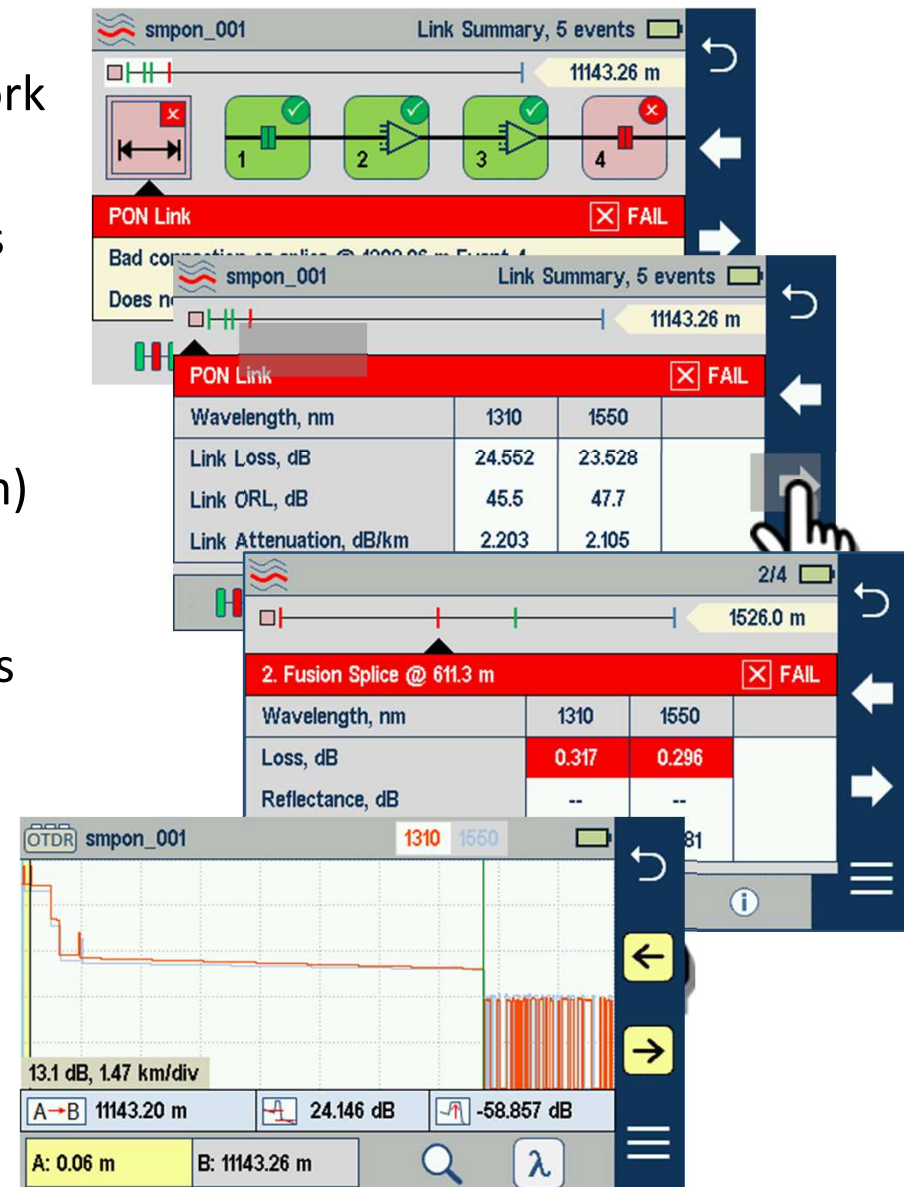

- **Pocket Sized**
- **Performance Packed**
- **User Friendly**
- ***And Affordable***

- Handheld **OTDR / Fault Locator** family
  - **PON** and **Point-to-Point** testing available at 1310/1550 nm
  - **Live fiber** testing at 1650 nm (filtered detector)
- **LinkMap® View** – Network Configuration at a glance
- **SmartAuto®** – Auto scan using network-optimized multiple pulses settings
- **Pass/Fail Analysis**
  - Overall network health
  - Fault Detection: Location and reason
- Integrated **Source, Power Meter, VFL**
- **Pair with FOCIS Flex** Inspection Probe
- **Touch-screen** – Easy navigation
- **Bluetooth & USB** file transfers

# LinkMap® Interprets OTDR Trace

- Easy to understand **LinkMap** results
  - Icon-based representation of tested network
  - Color-coded event pass/fail reporting
  - Suggests corrective action for faulty events
  - Touchscreen event navigation
- LinkMap End-to-end **Link Summary**
  - Link Length, Loss, ORL, Attenuation (dB/km)
- LinkMap **Event Details**
  - Location, Type, Loss, Reflectance, Cum Loss
  - PON split ratio for detected splitters
- LinkMap **Fiber Section Details**
  - Section Length, Loss, Attenuation (dB/km)
- **Trace** available at touch of a button

# Configurations & Availability

- **FLEXSCAN Models:**

- **FS200-304:** 1310/1550/1650 PON & Pt-to-Pt Verification & Troubleshooting
- **FS200-300:** 1310/1550 PON & Pt-to-Pt Verification & Troubleshooting
- **FS200-100:** 1310/1550 nm Pt-to-Pt Verification / Troubleshooting
- **FS200-60:** 1650 nm Live PON Troubleshooting OTDR / Fault Locator
- **FS200-50:** 1550 nm Pt-to-Pt Troubleshooting OTDR / Fault Locator

- **Model Options:**

- Source and Power Meter (-P1) plus Bluetooth/WiFi (-W1)

- **Basic Kits:**

- Selected FLEXSCAN, USB cable, TRM 2.0 Basic, soft carry case

- **Plus & PRO Kits:** **Save \$300 - \$500** (vs. ordering separately)

- PLUS Kits: Basic Kit + Fiber Ring, One-click & TRM 2.0 Advanced
- PRO Kits: PLUS Kit + FOCIS Flex & 2 Adapter Tips

- **Complete Kits:** **Save \$800** (vs. ordering items separately)

- Complete BI Kit: PRO Kit + OFI-BI Optical Fiber Identifier
- Complete BIPM Kit: PRO Kit + OFI-BIPM Fiber Identifier with Power Meter

# What is FOCIS Flex?

Simple!  
Fast!  
Convenient!

## FOCIS Flex Connector Inspection

- **Single button operation**
  - Auto-focuses, centers, captures, analyzes & sends
- **Auto-focus and Auto-centering** – What could be easier?
- **Pass/Fail Analysis** – IEC, AT&T, IPC and User-set criteria
- **Use independently or pair with FlexTester or FLEXSCAN**
- **Bluetooth and USB** image and results transfer
  - Auto-sends captured image and pass/fail results to FlexTester
  - Received image instantly displayed on FlexTester
  - Pass/Fail results available for display on FlexTester
  - Inspection results may be saved with FlexTester OTDR traces
- Internal **Storage** for images and results
- **Interchangeable adapter tips** for most connectors
- 8 hours typical battery operation with power save enabled

# Why OFI-BI and OFI-BIPM?

- **Superior Performance:**
  - Best OFI Signal Detection Sensitivity on the market today
  - Ensures traffic will not be interrupted and fibers will not be damaged
- **Simple Operation Using Universal Fiber Clamp:**
  - No need to change multiple clamp heads – saving time
- **Easily Identifies both Live and Trace Fibers**
  - Traffic (CW), Tone (270 Hz, 1K or 2K)
- **Positive Stop Plunger:**
  - Mechanism provides the right amount pressure ensuring proper detection without excess bending loss

# Fusion Splicing Products

- Core and Active Cladding Alignment Splicing Systems
- V-groove Alignment and Mass Splicing
- Splicing Accessory Systems
- Precision Fiber Cleaving
- Factory Precision Splicing Systems
- Fiber Recoating Solutions
- Automated Fiber Preparation Systems
- Technical Support
- 24-hour Repair Services

# Introducing the Fujikura 41S

- Bluetooth technology for management of Bluetooth enabled fiber preparation accessories
- Highest accuracy cladding alignment loss estimation with Warm Splice Imaging (WSI)
- Automatic Arc Calibration functionality
- Dual camera, active v-groove alignment technology
- Extended electrode life – (5,000 – 6,000 arcs)
- Excellent visibility in direct sunlight with 5.0" TFT color LCD touch-screen display
- IP52 Ruggedized for shock, dust and moisture resistance
- Tool-less electrode replacement

# Fujikura 41S – Specifications

- Applicable fibers
  - Single-mode
  - Multimode
  - DSF
  - NZDS
- Loss Estimation with WSI Core Sensing
- Number of fibers: single fiber
- Bluetooth 4.1 LE
- 100 splice modes
- 30 heating modes
- Stores up to 2,000 splice results
- Electrode life: 5,000 – 6,000 splices
- Dimensions
  - 120 W x 189 D x 71 H (mm)
  - 4.72 W x 7.44D x 2.8 H (in.)

- Operating conditions
  - Altitude: 0 to 5,000 m above sea level
  - Wind: 15 m/sec
  - Temperature: -10° to 50°C
  - Humidity: 0 to 95% RH

# 90R Splicer

- Field replaceable V-grooves
- Automated cleaver tracking and blade rotations via Bluetooth
- Customized functionality to meet your style
- Ruggedized for drops in 6 orientations & moisture and dust resistance
- 200µm ribbonized splicing compatibility with optimized accessories
- Versatile work tray & case with increased storage capacity
- Graphical User Interface with 5.0" Touchscreen

# Replaceable V-grooves

- Glass & debris buildup eventually make V-grooves uncleanable
- No longer required to send splicer in for service when this occurs
- Replace V-grooves in the field in minutes
- Only tool needed is a hex wrench
- Easier to clean V-grooves outside of splicer
- Spare set with stabilized electrodes included in 90R kit

# Bluetooth Accessory Management

Blade Management screen showing blade usage data:

	No.1	No.2	No.3	No.4	No.5	No.6	No.7	No.8
HEB	0	0	0	0	0	0	0	0
MGB	0	0	0	0	0	0	0	0
L(1)	25	1	0	0	0	0	0	0
	No.9	No.10	No.11	No.12	No.13	No.14	No.15	No.16

MGB	0	0	0	0	0	0	0	0
L(1)	0	0	0	0	0	0	0	0

Blade Height : L(1)

Reset button

- Maximize Cleaver Blade Life
- Splicer Rework Reduction
- Increased Operator Efficiency and Confidence
- Reduced Cost of Ownership
- More time splicing and less time managing fiber prep accessories

# 90S Splicer

- Fastest and most ergonomic core alignment splicer
- Automated cleaver tracking and blade rotations via Bluetooth
- Customized functionality to meet your style
- Loose & tight buffer splicing – same sheath clamps
- Ruggedized for drops in 6 orientations & moisture and dust resistance
- Versatile work tray & case with increased storage capacity
- Graphical User Interface with 5.0" Touchscreen

# Speed & Efficiency

- Fewest manual steps required to complete a splice

- Automated mechanics that lower your total splicing time

- Output capacity unmatched by any other single fiber splicer

# Some Specifications

- Applicable fibers
  - Single mode
  - Bend-Insensitive
  - Multi mode
  - DSF
  - NZDS
  - LEAF
- Automatic Arc Calibration function
- 80μm - 150μm cladding diameter
- Up to 3mm coating diameter
- 5 – 16mm cleave lengths
- 7s splice in SM Fast
- 13s heat with standard 60mm sleeve
- Battery life: 300 splice & heat cycles
- 5.0" TFT Touchscreen
- Dimensions
  - 170W x 173D x 150H (mm) – 2.8kg
  - 6.70W x 6.81D x 5.9H (in.) – 6.17lbs.

- Operating conditions

- Altitude: 0 to 5,000m above sea level
- Wind: 15 m/sec (34 mph)
- Temperature: -10° to 50°C
- Humidity: 0 to 95% RH

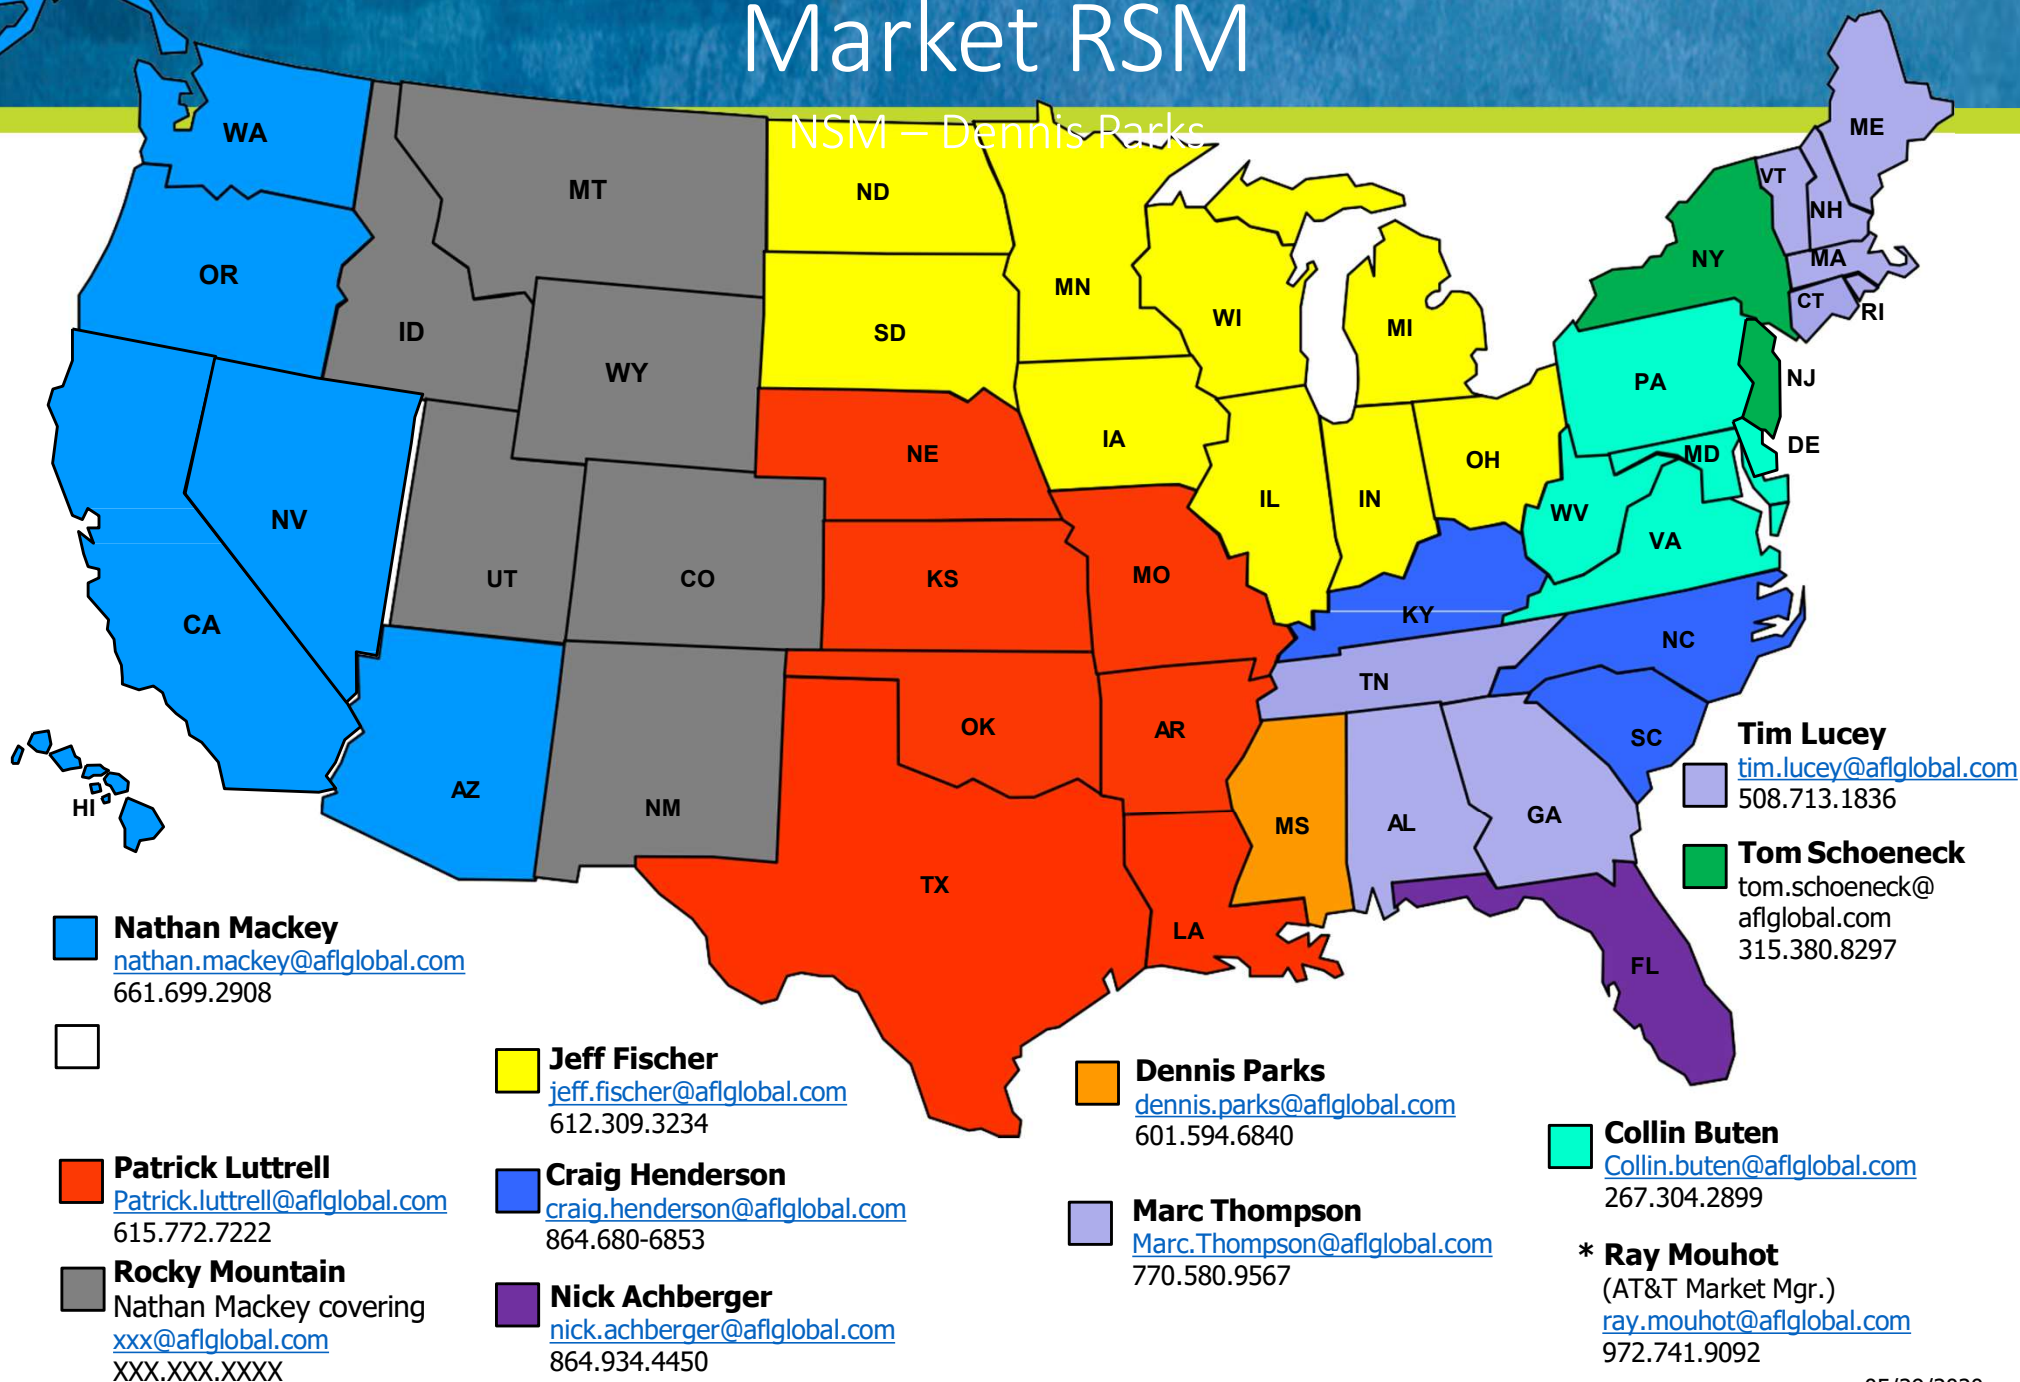

# Fusion Splicing Systems – Field Products

## **Splicer Technical Support Line (800) 866-3602**

- Available 24/7
- Support includes a staff of repair technicians and engineers
- Fluent Spanish speaking technical support available
- AFL stocks all necessary repair parts and consumables
- Same day turnaround available
