01

Who are we?

Driven by a passion for progress, LiteLinx is committed to solving practical, day-to-day challenges in cable construction

At LiteLinx

innovation drives everything we do. We are dedicated to transforming **fiber construction** with cutting-edge technology, leading to the development of **F360i**, our patent-pending **smart fiber** solution. Focused on efficiency and real-world challenges, we streamline processes to deliver measurable **value to our customers**.

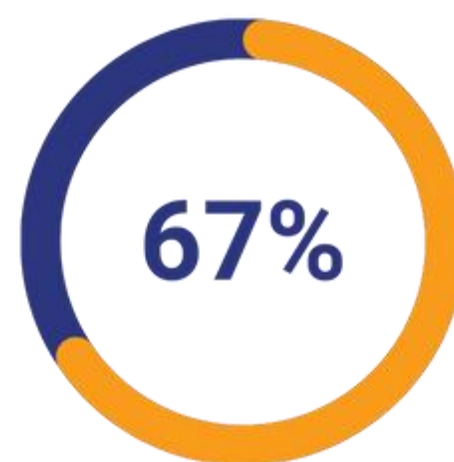

Fiber Construction Challenges

Cost Allocation in Fiber Optic Construction

Underground
Deployment

Aerial
Deployment

Project Delays and Budget Overruns

Prevalence of Overruns:

Approximately of construction projects **85%** experience cost overruns, with an all average overrun of **28%**

Extent of Overruns:

Large construction projects can exceed budgets by as much as 80% and take up to 20% longer to complete.

Real-time as-built

03

Time is Money

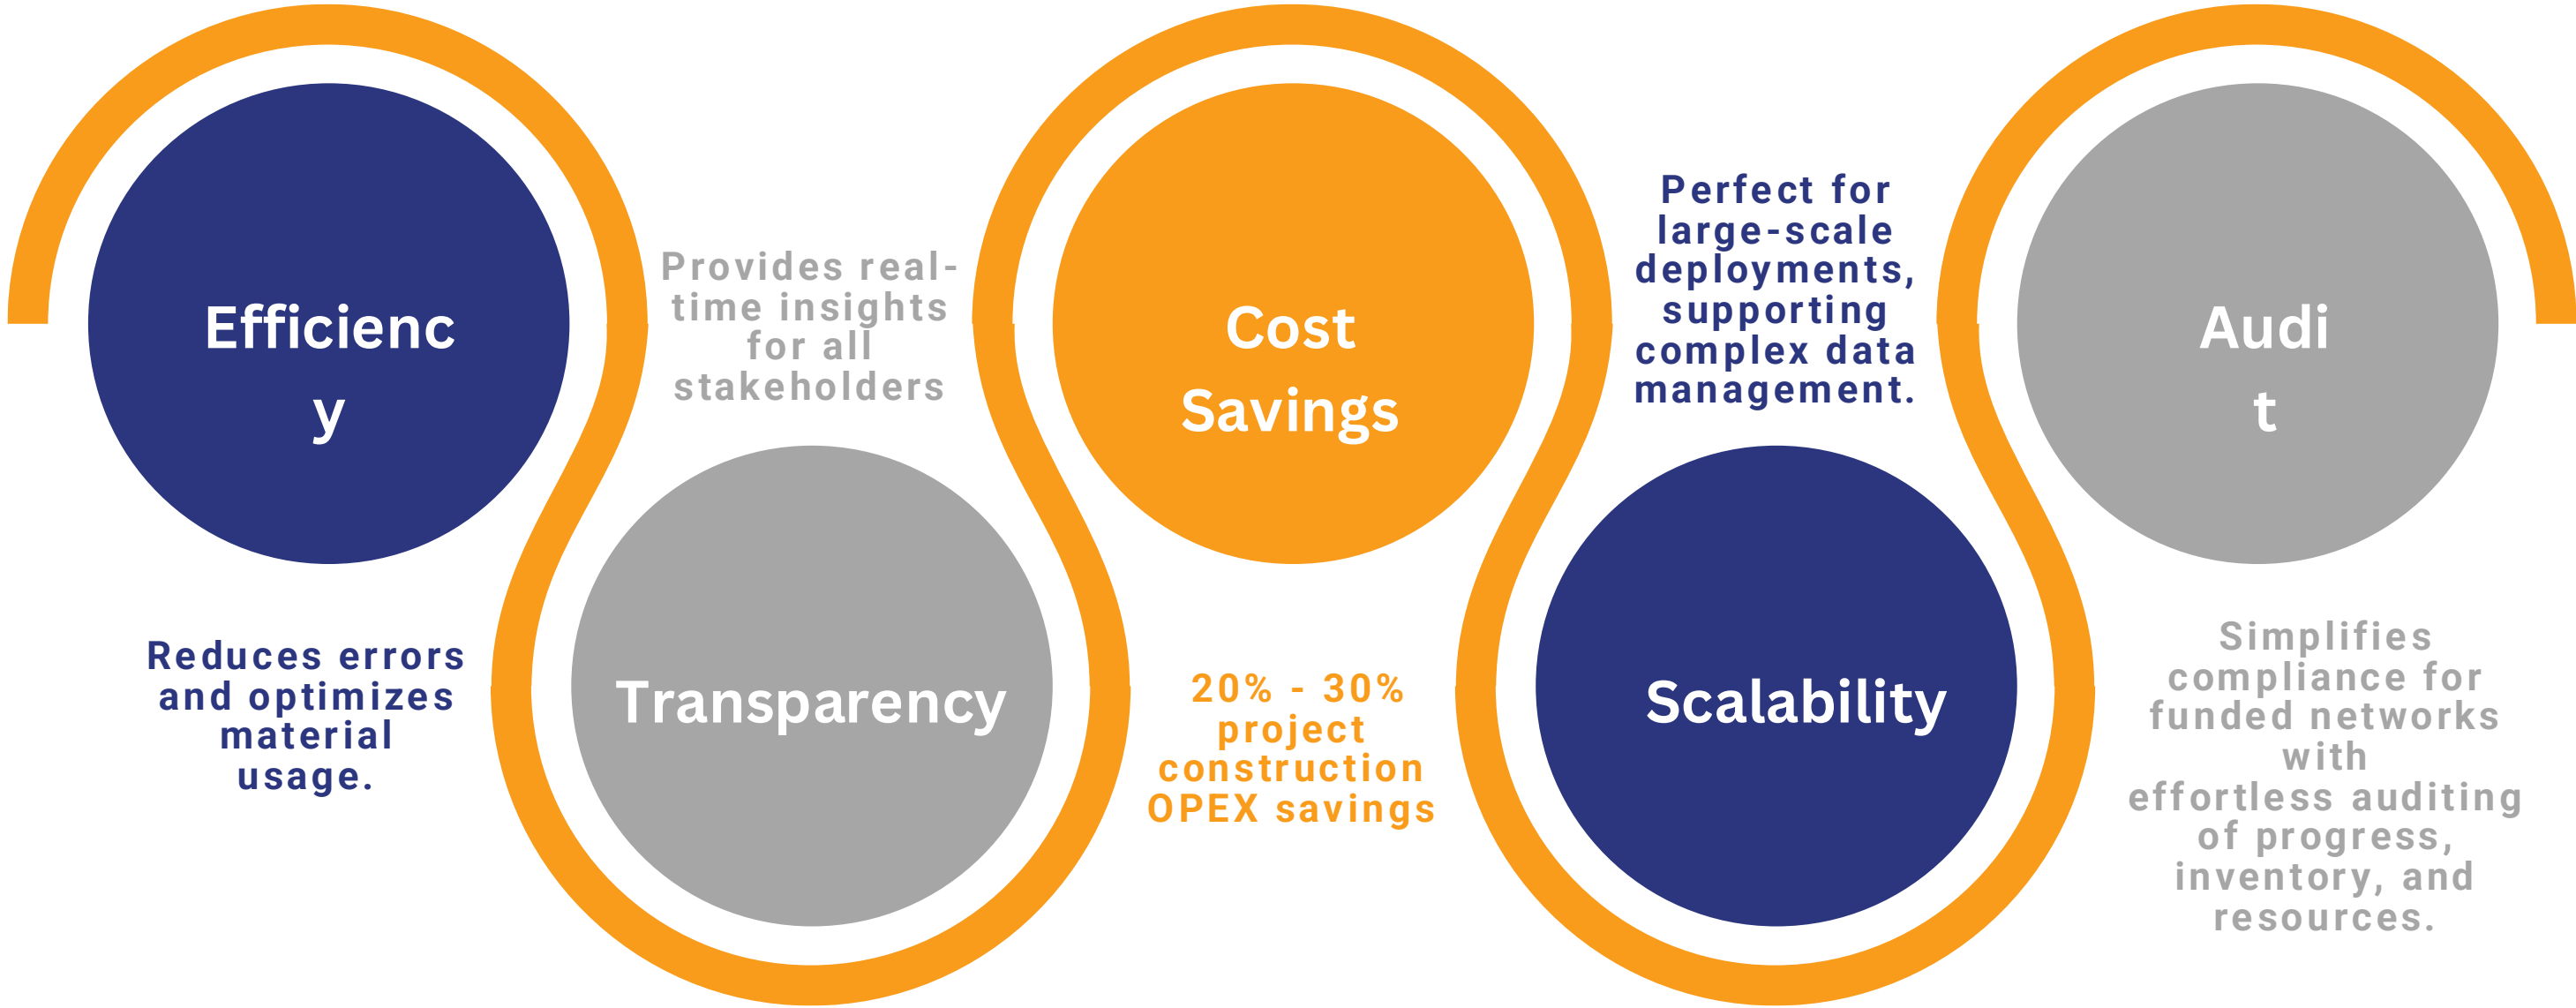

03

Category	Time Saved	How It Happens
Material Prep & Planning	30–40% faster	Smart warehouse and intelligent material management ensure materials are delivered, prepped, and used efficiently
Field Installations	20–30% faster	Crews follow digital work orders, install once, real-time verification
Truck Rolls & Rework	50–70% fewer	Real-time validation = no need to return for QC or reinstallation
As-Built Documentation	80–90% time saved	Automatically generated in the field with geo-accuracy
Inventory Reconciliation	50–60% faster	Live tracking reduces manual logging and site visits
Project Closeout	25–35% faster	Faster approvals thanks to transparent, real-time records

Impact
